UAE eInvoicing Programme

eInvoicing Introduction

eInvoices are not:		Images of invoices such as JPG or TIFF		Unstructured HTML invoices on a web page or in an email	
	Paper invoices sent, like images, via fax machines		OCR (Scanned paper invoices)		Unstructured invoice data issued in PDF or Word formats

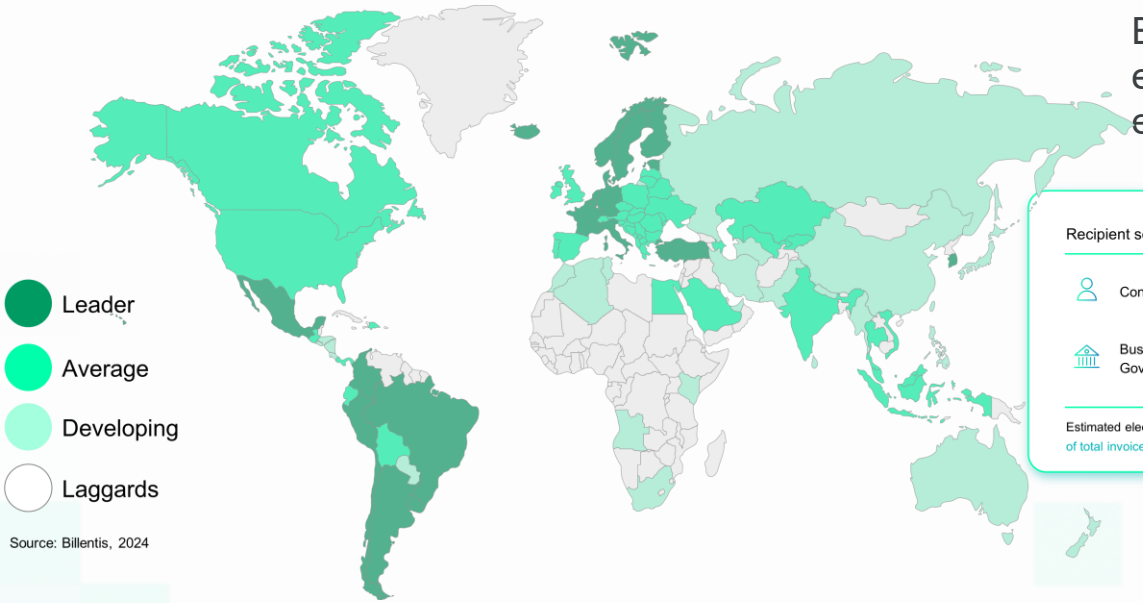

eInvoicing Introduction

Electronic invoicing (eInvoicing) is the exchange of the invoice documents between a supplier and a buyer in an integrated electronic format

An eInvoice is an invoice that has been issued, transmitted and received in a structured data format which allows for its automatic and electronic processing

eInvoicing Worldwide

eInvoicing Milestone Achievement:
5-Corner Model Live in the UAE for the Pilot Phase

- **Exchange of eInvoices Between Businesses Now Opened:**
  - **Businesses can select and onboard with their preferred Accredited Service Provider (ASP) via EmaraTax**
  - **Once onboarded, they can immediately begin exchanging eInvoices between C1/C2 – C3/C4.**
- **Corner 5 ready for Pilot Phase.**
- During the Pilot Phase, participating entities will test key capabilities, including invoice exchange processes, interoperability between systems, compliance requirements, and user experience enhancements. The insights gathered will support further refinement and preparation for wider implementation.
- **Businesses are encouraged to take immediate action by selecting their ASP, completing the necessary contractual arrangements, and initiating onboarding to benefit from the available eInvoicing capabilities.**
